

Espoo biofireplace

Living with quality

Smart solutions

Introduction to our latest design:

Espoo - a bio fireplace, designed for those who want to surround themselves with aesthetics and quality.

Functionality and smart solutions

Espoo is an innovative bioethanol burner that combines advanced functions with a focus on design and safety.

A filling system with an external electronic pump offers several advantages for the user. It provides a more precise, controlled and drip-free filling process.

When filling, the pump nozzle can be easily released with a mechanism on the fireplace

With traditional manual methods, there may be a greater risk of spillage or overfilling. Here, on the other hand, the bioethanol is dispensed exactly; It is both convenient and user-friendly.

The built-in sensor detects the temperature of the burner, which completely prevents refilling if the tank is still hot or in use.

The bio burner is started quickly on the ignition button. This means that you completely avoid challenges with matches or lighters. The burner can easily be adjusted or switched off.

Design and function

The wooden legs for the floor model not only give a natural and warm look, but also contribute to the bio fireplace's stability and durability.

In addition, you can also choose the more stringent design, where there is one metal foot with a base plate - this gives a more minimalist look for the fireplace.

This variant and the ceiling model can be rotated 360 degrees, so you can enjoy the fireplace regardless of where you sit.

With the ceiling model, it is possible to adjust the height, as it comes standard with a smart telescopic rod.

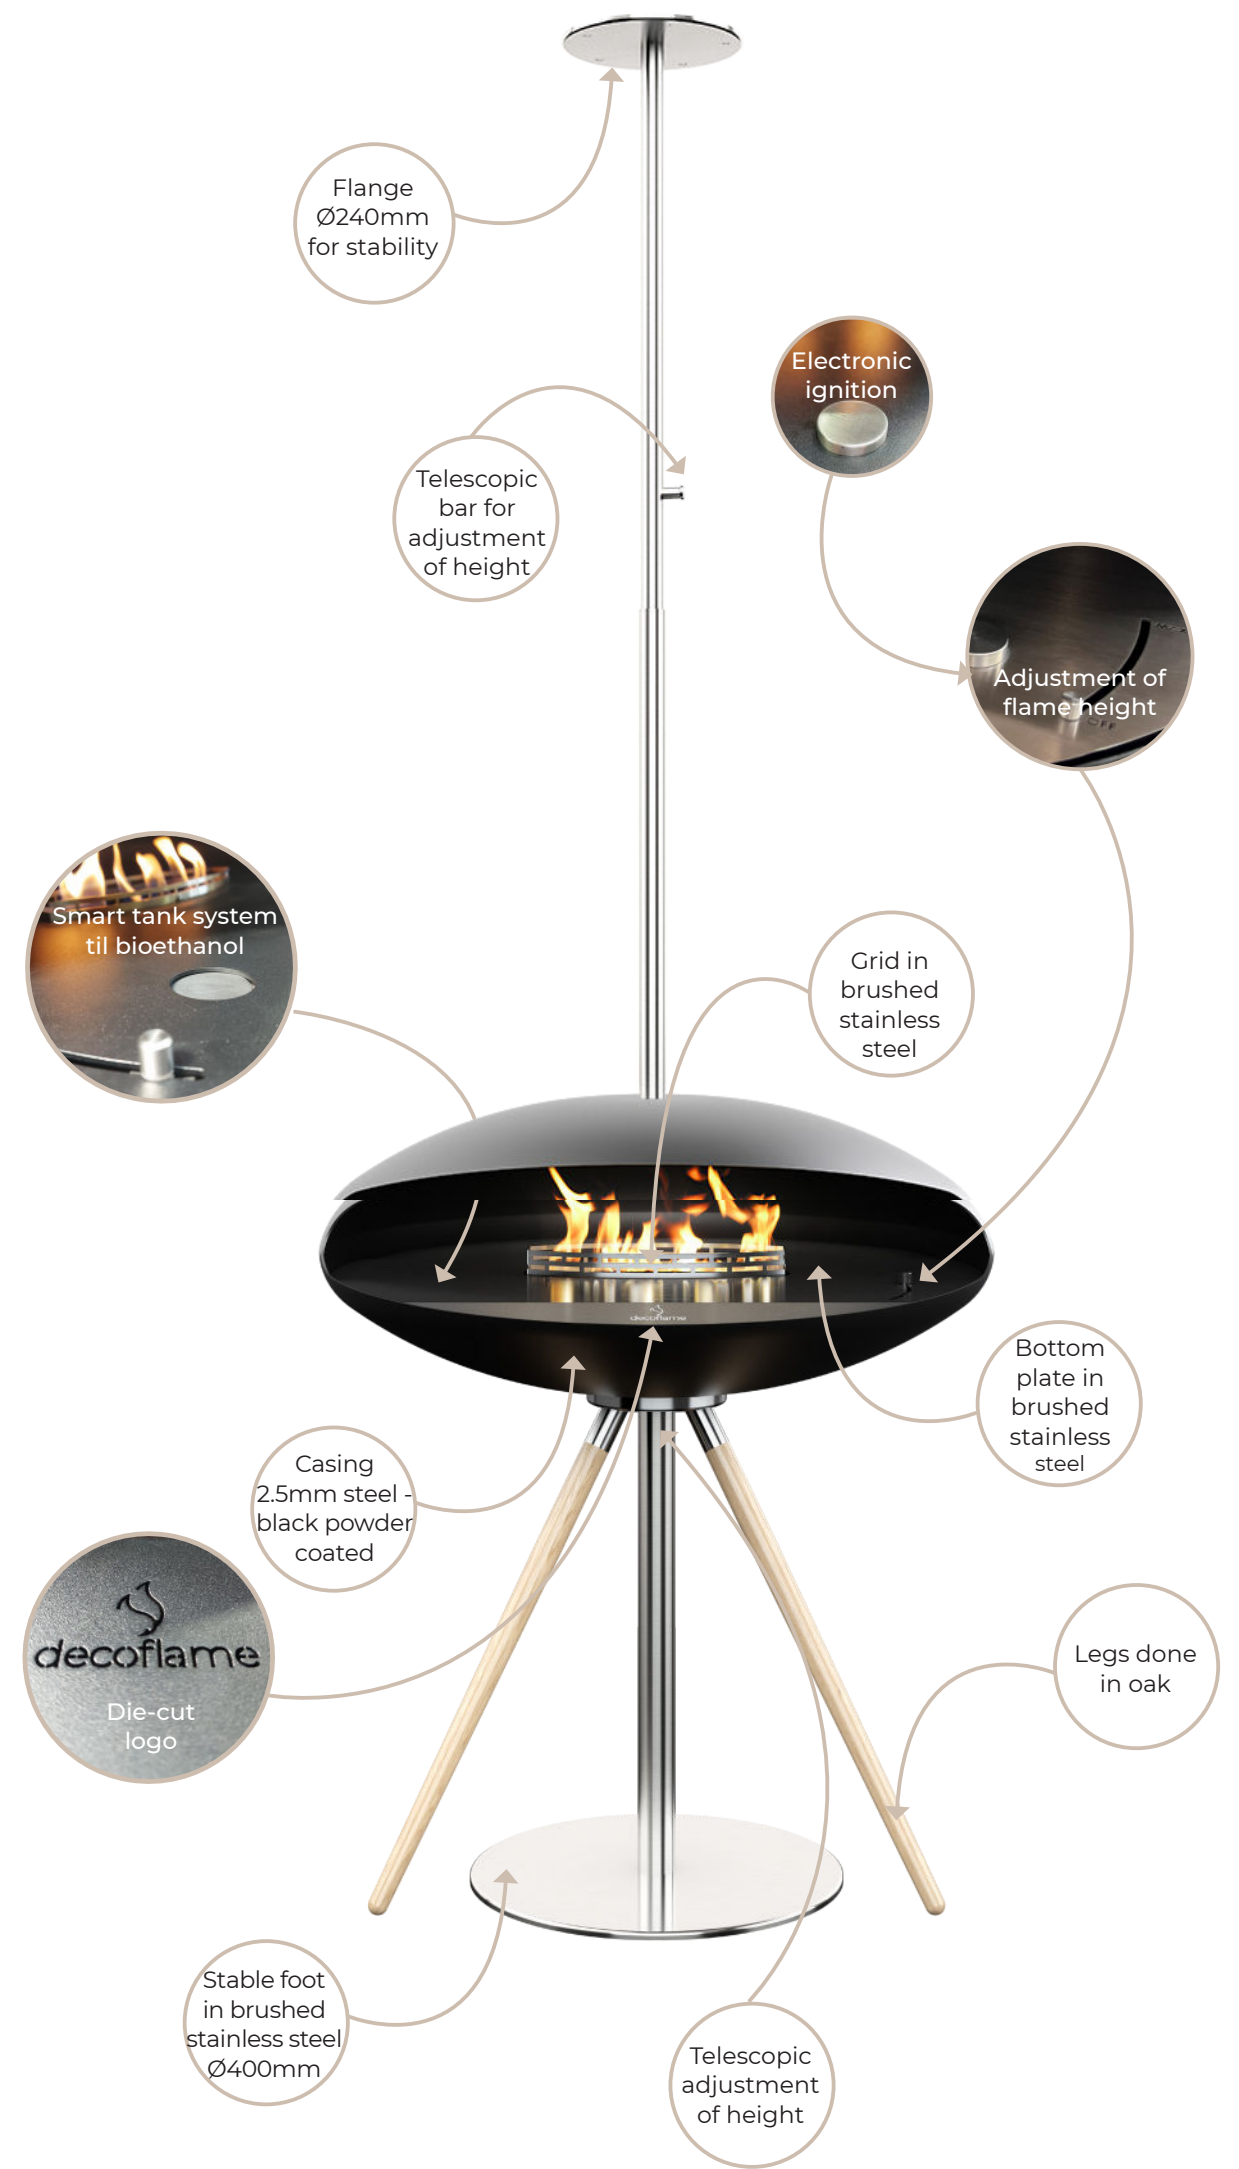

Regardless of where Espoo is placed in the home, it will bring class and style to the room - and not least lots of coziness.

Technical information:

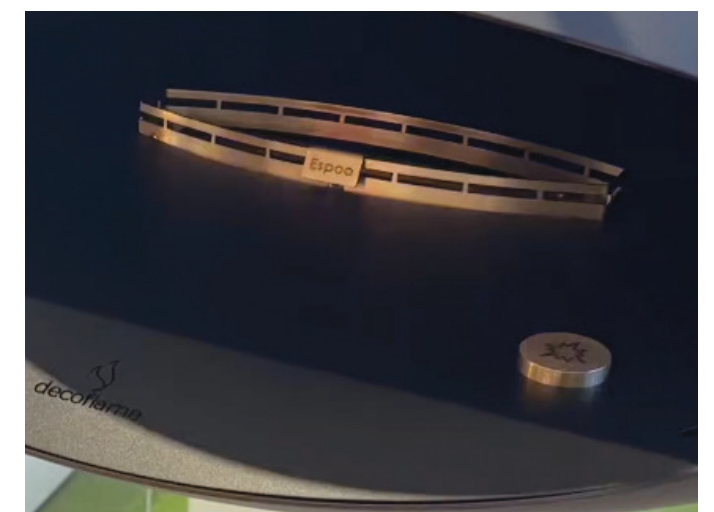

Capacity: Max. 2,4 liters
 Burning time: Max. 5-10 h. (Depending on intensity)
 Heating output: 1,3-2,6 kWh
 Net weight: Approx. 37 kg
 Material: Powder-coated steel
 Finish: Standard matte black
 Fuel: Bioethanol at 96.5 - 97.5%

Functions:

- Manual burner with electronic ignition
- External electronic fuelpump included in price
- Safety sensor that secure the burner can't be refilled while it is hot
- Smart closing system for the burner
- Manual regulation of flame intensity
- Large tank with discreet lid that maintains the design
- No chimney required
- No smoke, ash or soot
- Available as both a floor and ceiling model
